cleaner cleaners collection

- optionsforlife Peroxide Kitchen & Bathroom Cleaner, 16 fl. oz.
- optionsforlife Neutral pH Multi-surface Cleaner, 16 fl. oz.
- optionsforlife Non-fuming Tub & Tile Cleaner, 16 fl. oz.
- optionsforlife Ammonia-free Glass & Window Cleaner, 16 fl. oz.

optionsforlife household and office cleaning products represent the very latest in 21st Century bio-based green cleaning chemistry. It starts with replacing toxic, non-renewable petroleum-based surfactants (primary cleaning agents) with plant-based surfactants.

But that's just the beginning ... we also:

- * replace chlorine bleach with safer to handle hydrogen peroxide;
- * replace acids used in tub and tile cleaners with an organic salt solution;
- * replace non-biodegradable alcohol (commonly used in glass cleaners) with biodegradable solvents that are not nearly as irritating to the skin.

Compared to conventional cleaners, optionsforlife non-toxic cleaners receive better marks for surface gloss retention and surface safety (meaning they don't dull and scratch surfaces over time).

And, in performance test after test, optionsforlife cleaners consistently outperform the competition.

optionsforlife cleaning products are much safer to use around children, pets and plants -- and they are better for the environment.
